SUMMARY

- Full-stack **.NET Developer with 3+ years of experience** delivering high-quality solutions across the industry. I help companies enhance performance and design, driving user engagement and business success.
- Improved the page performance by 80% and enhanced the layout to make it more intuitive, resulting in a **170% increase in e-commerce conversions.**
- **Led a development team** to create a project for a nursing home, which managed the reception of elderly residents and the medication administration for each patient.

SKILLS

C Sharp (C#), .Net, .Net Framework, ASP.Net, .Net MAUI, Blazor, Razor, Back-end, SQL, MVC, Git, Github, Microservices, Rest Api, EF Core, Linq, Postman, SQLite, Microsoft Azure, Amazon Web Services, Agile Methodologies, JavaScript, TypeScript, Node, HTML, CSS.

EXPERIENCE

Full-stack Engineer   Aug 2022 - Present
Autolab - Chile
- Developed a high-performing e-commerce platform using .NET technologies, by focusing on a user-friendly interface and seamless functionality, which **increased customer satisfaction by 90%**.
- Performed ongoing maintenance, including bug fixes, performance improvements, and feature implementation by regularly monitoring and updating the platform based on client needs, leading to enhanced platform stability, higher client retention, and a **growth of 120,000 new users in the last year**.
- Used Xamarin to maintain and enhance a mobile application by optimizing queries and implementing caching strategies, **resulting in a 60% performance improvement**. These enhancements ensured efficient operation in both online and offline modes, improving usability for customers.
- **Optimized methods processing over 100,000 objects**, significantly improving performance and enabling more efficient data exchanges between ERP(Enterprise Resource Planning) systems with clients.
- Integrated payment methods, including Mercado Pago and Transbank into the platform, streamlining transactions and improving the user experience for clients.
- Developed and implemented a **token-based authentication** system for API integrations, strengthening security across multiple systems.

PERSONAL PROJECTS

Child care forum
- Developed a child care forum using .NET 5, Razor, jQuery, and SQL Server, enabling parents to connect with doctors and other families, ask questions and receive advice, providing valuable support and guidance.
